**Introduction:** Blockchain is a shared, immutable ledger that facilitates the process of recording transactions and tracking assets in a business network. An asset can be tangible (a house, car, cash, land) or intangible (intellectual property, patents, copyrights, branding NFT's etc.). Virtually anything of value can be tracked and traded on a blockchain network, reducing risk and cutting costs for all involved. BlockChains are typically managed by a peer-to-peer network for use as a publicly distributed ledger, where nodes collectively adhere to a protocol to communicate and validate new blocks. Blockchains are considered secure by design and exemplify a distributed computing system.

**SharkToshi:** This Paper presents a fan token SharkToshi “ Satoshi fan token” A Tribute to Satoshi. Be more than a fan by holding SHARK TOKENS and take part in future decisions of the first of its kind of Satoshi fan token project democratically by the users for the users. SharkToshi Fan Token is named after Satoshi Nakamoto, the anonymous person (or persons) that published the white paper in 2008 that jumpstarted the development of the bitcoin cryptocurrency. The whitepaper, “Bitcoin: A

Peer-to-Peer Electronic Cash System,” described the use of a peer-to-peer network as a solution to the problem of double-spending found in previous cryptocurrency concepts. The satoshi is the smallest unit of the cryptocurrency bitcoin. It is named after Satoshi Nakamoto, the founder(s) of the protocol used in blockchains and the bitcoin cryptocurrency. The satoshi to bitcoin ratio is 100 million satohis to one bitcoin. In future based on SharkToshi progress a blockchain will be launched democratically by the SHARK TOKEN HOLDERS on the technical basis of SOLAN Hybrid Proof of History (PoH) - a Proof for verifying orders and History between events alongside with consensus algorithm Proof of Stake (PoS).

**Contract:** Initially Launched on Tomochain Network. Currently available on both Binance Smart chain as well as TomoChain. [BEP20 Contract Address](#) [TRC20 Contract Address](#). Token transfer from Tomochain to BSC Network is currently live, Burn the tokens on Tomochain network record transaction hash and contact the team on telegram to recieve the tokens on BSC network. The total supply Shark Tokens on both the networks will never exceed 10 Billion Sharks. The SHARK HOLDERS will decide

**the future of the project democratically by the users for the users.**

**Contracts:**

**BEP20 BSC Network:**

**0x28B0364222A51Fb5D653bF501889020801962088**

**TRC20 TomoChain Network:**

**0x8865280c31B8CBC7b96cE48Ad52C122E6D82806a**

**How To Buy Shark Tokens:** Download MetaMask or TrustWallet (From the official Source). Connect the wallet with the TomoChain Network and transfer some Tomo Coins to the wallet and connect the wallet with the LuaSwap Dex and enter the SharkToshi Contract address and Swap the Tomo for Shark Tokens and follow the same steps for Binance Smart Chain Network.

**TokoNomics:** A total of one time fixed 21 Billion Tokens have been minted during the contract Deployment. No ICO or Funds were Raised For the project. The detailed Information of tokonomics is explained below in the graphical representation. Initially the tokens were Airdropped to Tomo and Lua holders with some restrictions and now the tokens will be airdropped via CoinMarketCap Company after the listing of Sharktoshi token on CMC.

A total of 11 Billions tokens burned and 9 Billion in LuaSwap LP holdings and 1B for Airdrops and Marketing.

**White paper will be updated if needed by the consent of community but it won't affect the tokonomics of this project.**
